NEW ZEALAND SCHIPPERKE CLUB

You will be pleased to know that Schipperkes are gradually being seen in increasing numbers both in the show ring and obedience ring since their reintroduction to this country only a few years ago.

As you probably know New Zealand is divided into two islands which does have the effect of inhibiting the distances one can easily travel to a show. We realise that in your country people travel vast distances to attend shows but with our gasoline four times your price and automobiles more than double in price, you do have an advantage. Never-the-less travel people will; and usually for a trip to the other island. If time is important (and it usually is), we resort to flying. Our national airline is equipped with Boeing 737's which have pressurized cargo holds for the comfort of the dogs and also they are speedy.
