Pancho is the type of bitch that breeders wait a lifetime for. She has not only put the mark of excellence on her puppies, but her get have gone on to continue the Schip-By-Me 'Tradition of Excellence'. Pancho's get have taken multiple placements in both National & Regional Specialties, which have included; Best in Futurity, Best Opposite in Futurity, Winners Dog, Winners Bitch, Best of Opposite Sex to Best of Breed, Best in Sweeps, Best Opposite in Sweeps & Judge's Awards of Merit. As well, her kids & grandkids have taken Best in Show, Group wins and multiple Group placements, both male and female alike. To say we are proud of her is an understatement. Pancho is a one of a kind Schipperke. Not only has she proven herself a producer of exceptional Schips, but she has also been the recipient of multiple Best of Breeds herself. Pancho has proven the Quality is not an accident, but rather a proven plan that strives towards excellence. Owners' Johnnie & Alan Maschhoff

Ch Schip-By-Me Whynot Ms M.

Ms M is a Pancho Granddaughter who finished her Championship at 7 months. Ms M stepped into the show ring at the tender age of 6 months at the Arizona Specialty where she took: Winners Bitch, Best of Winners & Judges Award of Merit for a 5 point major. She went on to take two Best of Breeds over the Male specials on the way to her Championship. Ms M is a spunky and loving little girl and perpetuates the Schip-By-Me and Whynot "Tradition of Excellence".

SCHIPPERKE BREED STANDARD

General Conformation

General Appearance

The Schipperke is an agile, active watchdog and hunter of vermin. In appearance he is a small, thickset, cobby, black, tailless dog, with a fox-like face. The dog is square in profile and possesses a distinctive coat, which includes a stand-out ruff, cape and culottes. All of these create a unique silhouette, appearing to slope from shoulders to croup. Males are decidedly masculine without coarseness. Bitches are decidedly feminine without overrefinement.

Any deviation from the ideal described in the standard should be penalized to the extent of the deviation. Faults common to all breeds are as undesirable in the Schipperke as in any other breed, even though such faults may not be specifically mentioned in the standard.

Size, Proportion, Substance

Size--The suggested height at the highest point of the withers is 11-13 inches for males and 10-12 inches for bitches. Quality should always take precedence over size. **Proportion**--Square in profile. **Substance**--Thickset.

Head

Expression--The expression is questioning, mischievous, impudent and alert, but never mean or wild. The well proportioned head, accompanied by the correct eyes and ears, will give the dog proper Schipperke expression.

Skull--The skull is of medium width, narrowing toward the muzzle. Seen in profile with the ears laid back, the skull is slightly rounded. The upper jaw is moderately filled in under the eyes, so that, when viewed from above, the head forms a wedge tapering smoothly from the back of the skull to the tip of the nose. The stop is definite but not prominent. The length of the muzzle is slightly less than the length of the skull.

Eyes The ideal eyes are small, oval rather than round, dark brown, and placed forward on the head.

Ears--The ears are small, triangular, placed high on the head, and, when at attention, very erect. A drop ear or ears is a disqualification. **Nose**--The nose is small and black. **Bite**--The bite must be scissors or level. Any deviation is to be severely penalized.

Neck, Topline, Body

Neck--The neck is of moderate length, slightly arched and in balance with the rest of the dog to give the correct silhouette. **Topline**--The topline is level or sloping slightly from the withers to the croup. The stand-out ruff adds to the slope, making the dog seem slightly higher at the shoulders

than at the rump. **Body**--The chest is broad and deep, and reaches to the elbows. The well sprung ribs (modified oval) are wide behind the shoulders and taper to the sternum. The fore chest extends in front of the shoulders and the front legs. The loin is short, muscular and moderately drawn up. The croup is broad and well-rounded with the tail docked. No tail is visually discernible.

Forequarters

The shoulders are well laid back, with the legs extending straight down from the body when viewed from the front. From the side, legs are placed well under the body. Pasterns are short, thick and strong, but still flexible, showing a slight angle when viewed from the side. Dewclaws are generally removed. Feet are small, round and tight. Nails are short, strong and black.

Hindquarters

The hindquarters appear slightly lighter than the forequarters, but are well muscled, and in balance with the front. The hocks are well let down and the stifles are well bent. Extreme angulation is to be penalized. From the rear, the legs extend straight down from the hip through the hock to the feet. Dewclaws must be removed.

Coat

Pattern--The adult coat is highly characteristic and must include several distinct lengths growing naturally in a specific pattern. The coat is short on the face, ears, front of the forelegs and on the hocks; it is medium length on the body, and longer in the ruff, cape, jabot and culottes. The ruff begins in back of the ears and extends completely around the neck; the cape forms an additional distinct layer extending beyond the ruff; the jabot extends across the chest and down between the front legs. The hair down the middle of the back, starting just behind the cape and continuing over the rump, lies flat. It is slightly shorter than the cape but longer than the hair on the sides of the body and sides of the legs. The coat on the rear of the thighs forms culottes, which should be as long as the ruff. Lack of differentiation in coat lengths should be heavily penalized, as it is an essential breed characteristic.

Texture--The coat is abundant, straight and slightly harsh to the touch. The softer undercoat is dense and short on the body and is very dense around the neck, making the ruff stand out. Silky coats, body coats over three inches in length or very short harsh coats are equally incorrect.

Trimming--As the Schipperke is a natural breed, only trimming of the whiskers and the hair between the pads of the feet is optional. Any other trimming must not be done.

Color

The outer coat must be black. Any color other than a natural black is a disqualification. The undercoat, however, may be slightly lighter. During the

shedding period, the coat might take on a transitory reddish cast, which is to be penalized to the degree that it detracts from the overall black appearance of the dog. Graying due to age (seven years or older) or occasional white hairs should not be penalized.

Gait

Proper Schipperke movement is a smooth, well coordinated and graceful trot (basically double tracking at a moderate speed), with a tendency to gradually converge toward the center of balance beneath the dog as speed increases. Front and rear must be in perfect balance with good reach in front and drive in the rear. The topline remains level or slightly sloping downward from the shoulders to the rump. Viewed from the front, the elbows remain close to the body. The legs form a straight line from the shoulders through the elbows to the toes, with the feet pointing straight ahead. From the rear, the legs form a straight line from the hip through the hocks to the pads, with the feet pointing straight ahead.

Temperament

The Schipperke is curious, interested in everything around him, and is an excellent and faithful little watchdog. He is reserved with strangers and ready to protect his family and property if necessary. He displays a confident and independent personality, reflecting the breed's original purpose as watchdog and hunter of vermin.

DISQUALIFICATION

A drop ear or ears. Any color other than a natural black.
